

Aqua Options Pty Limited is a service installation and civil construction company that is committed to meet or exceed the requirements and expectations of our clients

Aqua Options Pty Limited recognises that its activities are capable of having an impact on the environment.

To minimise this, we have established, implemented and maintain an Environmental Management System and is committed to managing all aspects of its work using risk management principals which also include pollution prevention.

Our Environmental objective is to eliminate our environmental impacts which may pose risks to the community, environment or property. Our target is to reduce waste going to landfill and to protect the environment directly affected by work

**Aqua Options Pty Limited is committed to the protection of the environment by ensuring:**

- Specific and measurable objectives and targets are established to ensure continual improvement aimed at eliminating the impact on the environment.
- Development, implementation, evaluation and review of work procedures to ensure environmental aspects and their impacts are eliminated and continually improved where possible
- That we comply with all relevant environmental legislation and adhere to regulatory standards at local, national and international levels as required
- Regular monitoring of the performance of environmental controls through environmental audits
- Waste is reduced through innovative work systems and recycling practices
- Increased use of environmentally acceptable materials, equipment and technology in place of those which are considered harmful
- That all employees of Aqua Options Pty Limited are acting to protect the environment by preventing and eliminating environmental pollution
- That our work practices include protection of the environment through sediment fencing and controls
- That we control dust on work sites through the use of water carts
- Having spill kits on hand in case of a chemical leakage to prevent contamination of waterways
- Using excavated material in other areas of the same project requiring filling materials when possible
- That our suppliers follow acceptable environmental protection practices and have procedures in place similar to our own to protect the environment.

**Our commitment to our staff includes:**

- To work together with our staff to achieve Aqua Options Pty Limited's objectives and targets.
- Training, education and resources are provided to our staff to ensure our Environmental Management System is continually improving to enhance environmental performance and awareness
- Reviewing and evaluating training needs on a regular basis
- Communicate the Environmental Management System through induction and commencement of employment and at periodic intervals.

Aqua Options is committed to monitor this policy's effectiveness, provide ongoing implementation and to review this document every two years or as required.
